PROFESSIONAL SUMMARY

Versatile programmer and IT professional who converts ambiguous requirements into production-ready systems and automated workflows. Partners with operations, product, and leadership to scope, prioritize, and deliver future-proof solutions that reduce cycle time and defects. Skilled in translating business goals into technical solutions, optimizing operations, and mentoring teams to improve quality and velocity. Combines hands-on coding with strategic planning, budget oversight, and clear stakeholder communication to ship reliable, modular services and products on time.
